

GLOBACOM NIGERIA LIMITED

1, MIKE ADENUGA CLOSE,
VI, LAGOS

Dear Sir/Ma,

RECOMMENDATION ON KAYODE-ADEOYE MAYOWA

I am writing on behalf of the above-named candidate who has shown interest in pursuing Masters in Computer Engineering at University of Missouri. Kayode-Adeoye Mayowa who graduated with a second-class upper Degree in November 2018 from the Department of Electrical and Electronics Engineering (Computer Engineering), University of Lagos, Nigeria, is an academically sound engineer with exemplary character and on field experience in IT infrastructure, Networking, Telecommunication and Business Analytics. He has a very high academic standing, amiable personality and an innovative mind. He also brilliantly completed his bachelor's degree program in the top 10 percent of his class, coupled with outstanding research experience as an undergraduate. He is a good team player and has proven to be exemplary in task delivery. As a junior colleague in Globacom Nigeria Limited, he has proven to be result oriented and his data analysis skills has helped improved departmental activities a great deal. He has a strong determination for independent research work which he has demonstrated severally whenever the department is been faced with new challenges, also has a sound ability of performing well, both in theory and practical. He is well trained, brilliant and undoubtedly cut out to make a difference pursuing international knowledge in his chosen field and career. I have known Mayowa for a while now, not just as a junior colleague, but as a mentee and brother. He is always striving for success. He would leave his department to proffer solutions in other departments, his energy is second to none and what I like about him is his ability to meet deadlines. He can work under pressure and I can categorically say without an iota of doubt that he'll be resourceful to this program and definitely to any society he finds himself after the completion of his program. His analytical skills, together with negotiation skills and knowledge in IT will make him outstanding if given the opportunity. I, therefore strongly recommend him for the Master's Program at University of Missouri as he'll surely be an asset.
